Flavoured Syrupy base q.s.

THERAPEUTIC RATIONALE

APTIZOOM syrup is a blend of appetizers and digestives. APTIZOOM has stimulatory effect on the secretions of GI tract, liver and pancreas. APTIZOOM stimulates appetite and promotes digestion by mediating through two possible modes:

- Stimulation of liver to secrete more bile enriched in bile acids (*Eclipta alba*)
- Stimulation of enzyme activities of both pancreatic and intestinal origin (*Scindapsus officinalis*, *Apium graveolens*, *Zingiber officinale*)

Embelia ribes and *Piper longum* exhibit anthelmintic activity while *Asparagus racemosus* makes APTIZOOM a potential immunoadjuvant. Unlike the conventional appetite stimulants, APTIZOOM is totally safe and devoid of drowsiness. *Eclipta alba* and *Apium graveolens* promotes healthy digestion. APTIZOOM is a natural appetite stimulant with proven clinical efficacy.

INDICATIONS

- Anorexia due to indigestion, any disease or drugs
- Slow growth in children due to poor appetite

DOSAGE

Children (below 10 years) – 5ml twice/ thrice a day for 4 weeks
