## THERAPEUTIC RATIONALE

ARJUNIN is a comprehensive cardioprotective. ARJUNIN has antianginal, hypolipidemic and antioxidant action. Terminalia arjuna reduces platelet aggregation, reduces cholesterol levels, normalizes blood pressure and improves exercise tolerance. Boerhaavia diffusa is anti-hyperlipidemic and reduces arterial plaques; Nardostachys jatamansi is an anxiolytic and brings down stress hormones.

## INDICATIONS

Chronic stable angina

## DOSAGE

1 capsule thrice daily
