## THERAPEUTIC RATIONALE

In sinusitis, CEPHAGRAINE nasal drops reduce inflammation, liquefy mucus and relieve congestion. CEPHAGRAINE tablet helps in neurogenic vasoconstriction and reduce excitability of neurons and thus, reduce the frequency, severity and duration of migraine. CEPHAGRAINE also relieves migraine associated sensory aura such as headache, nausea, vomiting and tinnitus etc.

*Piper longum*, *Calotropis gigantea*, *Gypsum* and *Datura metel* have analgesic properties and anti-inflammatory activity mediated by inhibition of prostaglandin synthesis. Carminative *Carum copticum*, antacid Sodium carbonate, hepatostimulant *Eclipta alba* and prokinetic *Zingiber officinale* help to relieve the symptoms of migraine by anti-nociceptive and adaptogenic action. *Ocimum sanctum* has adaptogenic and anxiolytic properties.

## INDICATIONS

- Migraine syndrome
- Tension Head ache
- Sinusitis

## DOSAGE

**In sinusitis:** 2 tablets twice a day to be taken orally and 2 drops to be instilled in each nostril every 4 hours. The course may be repeated after a month.
