Morus indica Fr.	50 mg	Mulberry (Shahatutt)	Astringent, Anthelmintic

THERAPEUTIC RATIONALE

EVENSHADE has property of depigmentation with significant tyrosinase inhibitory activity. It reduces hyperpigmentation, provides nourishment to the skin and thus promotes a clear young looking complexion. It removes excess oil and dirt from skin.

Prunus amygdalus is an emollient, maintains skin barrier and enhances complexion. It has a rich concentration of oleic and linoleic essential fatty acids. *Morus indica* exhibits skin whitening action as it can decrease skin melanin content. Furthermore, the decrease in erythema. *Begenia ligulata* heals and stimulates growth of healthy tissue. Gel of *Cucumis sativus* offers cooling, soothing, tightening effects to skin. *Almond oil* reduces photo-ageing.

Thus, EVENSHADE brightens the complexion, diminishes pigmentary marks and lightens melasma.

INDICATIONS

- Melasma
- Chloasma
- Hyperpigmentation

USAGE

Apply twice a day after a gentle face wash.
