THERAPEUTIC RATIONALE

PALLRYWYN FORTE is a natural aphrodisiac and sexual performance enhancer.

Mucuna pruriens, *Withania somnifera*, *Myristica fragrans*, *Anacyclus pyrethrum* and *Chlorophytum arundinaceum* are well known aphrodisiacs, which help improve libido in both the sexes. *Asparagus racemosus*, *Anacyclus pyrethrum* helps relieve vaginismus. *Withania somnifera* boosts sexual desire, alleviates frigidity and enhances the sexual performance. *Emblica officinalis* is an antioxidant. *Tribulus terrestris* increases some of the sex hormones and may be useful in mild to moderate cases of erectile dysfunction. In females PALLRYWYN FORTE improves frigid conditions and relieves vaginismus.

INDICATIONS

- Impotence – psychogenic / idiopathic
- Frigidity in the female
- Premature senility or loss of libido in both sexes.

DOSAGE

1 to 2 tablets twice a day to be taken preferably with milk. A minimum medication period of 8 weeks should be allowed to assess the response. PALLRYWYN FORTE can be co-prescribed with Charak's other formulations for related disorders e.g. with NEO (for managing premature ejaculation) or with ADDYZOA (for improving sperm count and morphology).

PRESENTATION

Blister pack of 20 tablets (silver-coated)
