THERAPEUTIC RATIONALE

SKINELLE is natural comedolytic and antimicrobial.

The main ingredients *Rubia cordifolia*, *Curcuma longa* and *Hemidesmus indicus* exhibit anti-inflammatory activity. SKINELLE suppresses the capacity of *Propionibacterium acnes* induced oxidative stress and pro-inflammatory cytokines, the two important inflammatory mediators in acne pathogenesis. *Brassica campestris* has fatty acids which help to repair skin barrier. *Acorus calamus* has antifungal property and *Curcuma amada* has antimicrobial property. *Coriandrum sativum* is an antioxidant and an astringent to reduce blemish and inflammation. SKINELLE cream, thus effectively controls acne, pimples and keeps the skin healthy.

INDICATIONS

Adolescent's acne vulgaris and premenstrual acne

DOSAGE / USAGE

SKINELLE CREAM should be applied regularly twice daily till the desired response is achieved.

PRECAUTIONS AND SPECIAL CONSIDERATIONS

The application of SKINELLE cream should be discontinued if signs of irritation or sensitization develop. The use of greasy cosmetics should be avoided. Patients should be restrained from squeezing or excoriating the lesions.
